

# OVEN LOADER

Capway

**The Capway Oven Loader ensures a reliable way of feeding different pan types onto the oven hearth.**

The whole feeding process is controlled by stoppers and a power-free accumulation zone in front of the oven loader, ensuring grouping and feeding of the oven without any mechanical damage to the pans or products. The oven loader meets the latest technical standards with special attention for hygienic and safety features. The unit is supplied as a stand alone unit and/or integrated in the total line control.
