

PAN/TRAY STORAGE

RoboGrip

Robotized, automatic storage system for the flexible and economic stacking and unstacking of different types of pans or trays within industrial production lines.

The RoboGrip system enables quick product changeovers and automatically adjusts the number of baking supports in the line required for each type of product. Pneumatic grippers maintain a positive hold on the pans.

ROBOGRIP PAN/TRAY STORAGE APPLICATIONS:

- Bread Pans
- Lids
- Baking Trays
- Peelboards

STANDARD FEATURES:

- Heavy-duty construction
- Fully robotized storage
- Storage of different types of baking supports
- Product detection
- Fence with safety switches

ADVANTAGES/BENEFITS:

- Custom-designed configuration
- Long lifetime
- No damage to pan coating
- Flexible line with short product changeover time
- System switches off upon entering of operators/maintenance people
